To our students and their families:
The **Niagara Liberty Partnerships Program** is pleased to present

The **Power of STEM**

At the newly renovated Niagara Power Vista!

**August 1\textsuperscript{st} – 5\textsuperscript{th}, 2016**

The New York Power Authority (NYPA) has re-imagined the Power Vista into an exciting and interactive learning space with 21\textsuperscript{st} century exhibits that teach about power generation, distribution, electricity use, and the geology of the Niagara River gorge. We are the first camp group that will get to try out the new exhibits and see what we can learn from them. In our STEM classroom on-site, students and teachers will engage in hands-on learning in SCIENCE (energy systems and electricity), TECHNOLOGY (collecting data with iPads), ENGINEERING (systems design), and MATH (measurement and problem solving). We will also explore the natural environment around the Falls to better understand how it came to be and how it works for us today.

---

Please mail your completed form to:

Jamie Reid, Liberty Partnerships Program
Niagara County Community College
3111 Saunders Settlement Road
Sanborn, NY 14132

First come, first-served. A Liberty staff member will contact you to confirm your child’s participation.
