

APPRENTICESHIP PROGRAMS AT

The State University of New York

WE ARE YOUR DOL

The economic health of New York State is reliant on a prepared workforce, enabled by SUNY's lifelong learning "education to work" career pipeline.

To grow a highly skilled workforce, the State University of New York (SUNY), in partnership with the New York State Department of Labor, coordinate activities to expand Registered Apprenticeship in New York with a focus on engaging small, medium, and large employers to secure paid apprenticeships in high-demand, competitive wage occupations.

New York State has provided \$9.0 million of funding for SUNY, via its community colleges, to create one of the largest statewide public/private partnership apprenticeship programs in the country. SUNY will use its statewide network of colleges to provide expertise and support to identify workforce needs, determine skills gaps, and engage employer sponsors to expand apprenticeships statewide. The SUNY Apprenticeship Program will assist in developing 2,000 pre-apprentices and Registered Apprentices over four to six-years in advanced manufacturing, healthcare, information technology/cybersecurity/artificial intelligence and other high-need fields (non-construction).

SUNY community colleges collaborate with the SUNY state operated campuses, Educational Opportunity Centers, Regional Economic Development Councils and the Statewide Workforce Development Boards.

Launched in 2018, the SUNY Apprenticeship Program anchors advanced manufacturing and information technology/cybersecurity/artificial intelligence at Mohawk Valley Community College and healthcare at SUNY Schenectady County Community College and has programs underway at nearly 20 SUNY colleges.

The New York College Apprenticeship Network (NYCAN) is funded by a \$7.9 million grant from the U.S. Department of Labor, Employment and Training Administration. This initiative will help train 3,200 apprentices, in partnership with employers, providing New Yorkers with careers in the advanced manufacturing sector. NYCAN will have a focus on online instruction for pre-apprentices and apprentices.

"Revere and our 300 plus employees operate in an extremely competitive industry which requires a highly skilled workforce to survive in the global market place. Individuals being educated through the SUNY Apprenticeship Program will fill the employment pipeline for the future. Revere looks forward to the opportunity to partner and work with SUNY to enhance the education and skills of our future workforce."

— Mike Choquette,

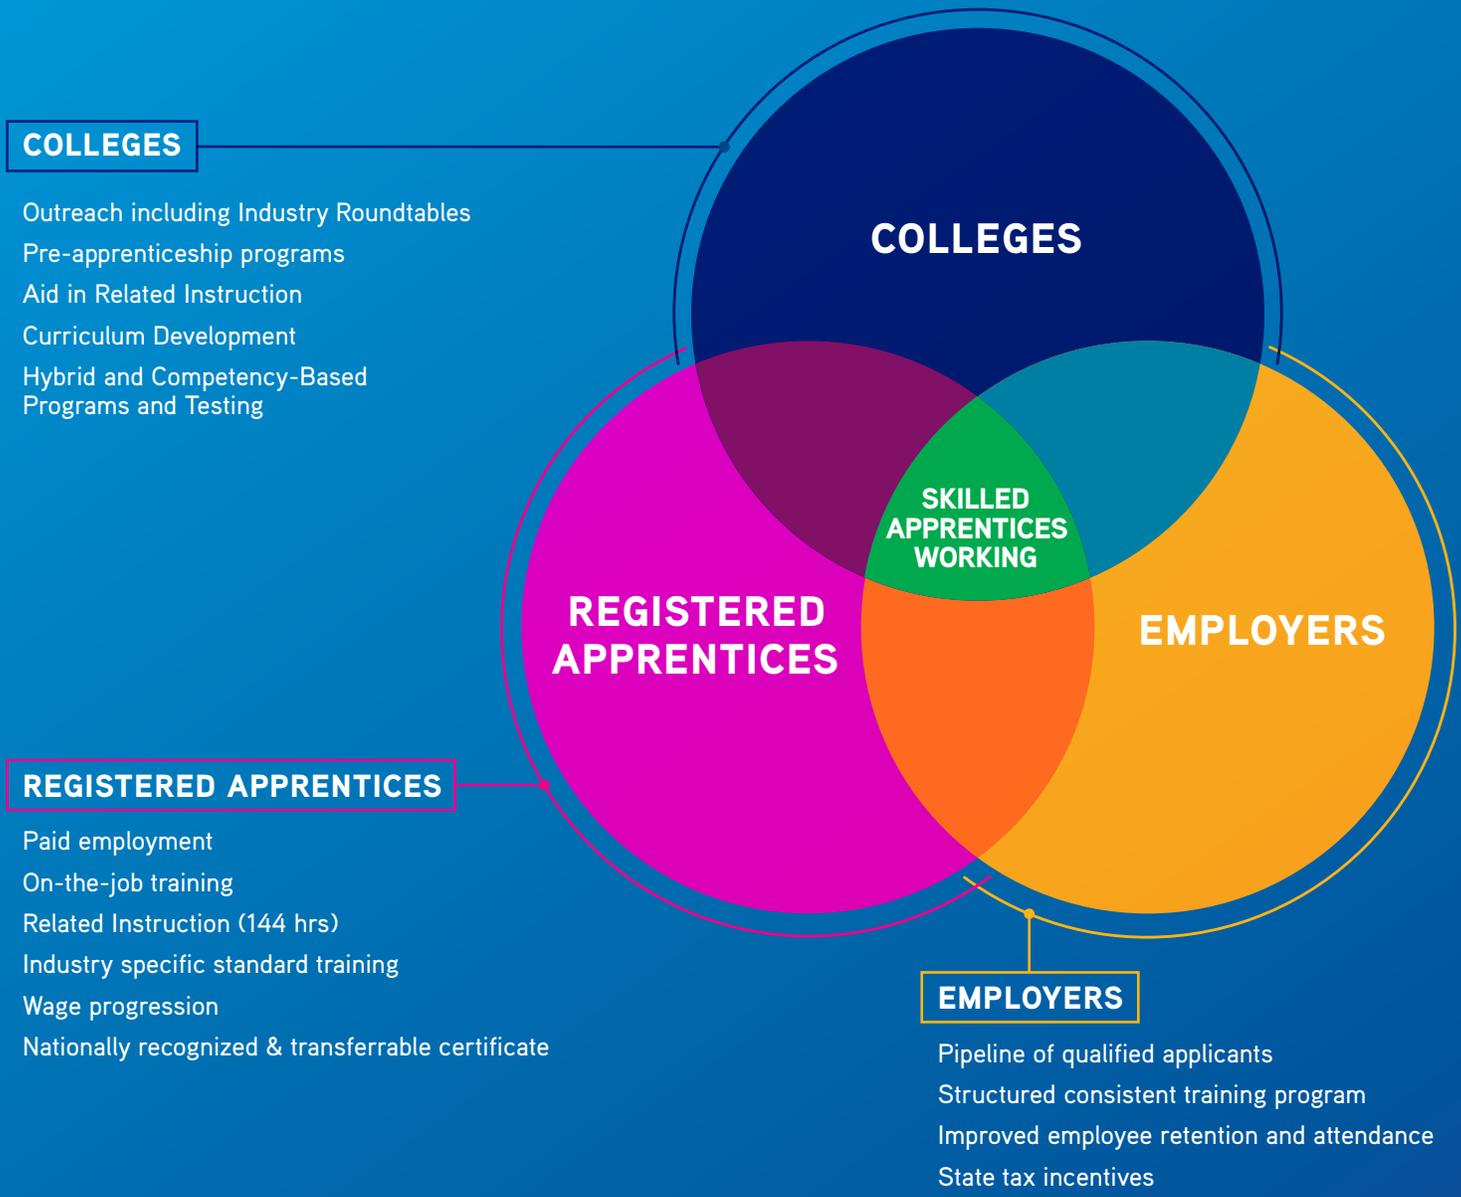

*Education & Training, Revere
Copper Company, Rome, NY*

COLLABORATION THROUGH APPRENTICESHIP

“A trained workforce is a strong workforce, and these registered apprenticeship programs address a growing need for skilled workers... These critically important apprenticeship programs will support our workforce and create good-paying jobs that are the foundation of New York’s middle class.”

— Andrew M. Cuomo, Governor, New York State

For more information, contact SUNY’s Office of Community Colleges and the Education Pipeline at: 518-320-1276 or your local SUNY college.

The New York College Apprenticeship Network is paid for by a \$7.9 million grant from the U.S. Department of Labor, Employment and Training Administration.
